

COUNT YOUR FIRE ALARMS

Every room, hallway and staircase should have a smoke alarm.

How many does your home have?

CHECK BATTERIES AND HEAR YOUR FIRE ALARM

Do you know what your fire alarm sounds like? Ask your parents to test each one so you know what to listen for!

CHECK YOUR HOME FOR HAZARDS

Such as blocked windows, covered space heaters, too many devices in power strip or frayed wires.

CREATE A FAMILY EVACUATION PLAN

Create an evacuation plan that has 2 ways out of each room. Practice it two times per year.

(Don't have one yet? No problem! Use our template to get started!)

americanspcc.org

FIRE EVACUATION PLAN

1. Draw a map of your home.

Draw each floor, each door, and each window.

2. Identify 2 ways to escape each room.

Make a plan for every possible scenario.

3. Designate a place to meet your family outside.

Is it across the street? At a neighbor's house? At a park?
